SECURITY INDEX LIST

Classified

There is attached hereto a current list of the names of the individuals maintained in the Security Index. Names included in the main portion of the list are arranged alphabetically. The names of individuals coming within five designated groups are listed on separate pages. Following each name is information reflecting the race, sex, birth date, Bureau file number and the Bureau field office covering the residence of the individual.

It is requested that this list be given utmost security.

Attachment

NOTE ON YELLOW ONLY:

Espionage Section of the Special Section not included.

The five designated groups are:

Foreign Government Employees

United Nations Employees

Pro-Tito Yugoslavia

U. S. Government Employees

Atomic Energy Program Employees

FROM :

SUBJECT: SECURITY INDEX - G-401
THIRTY-FOUR PROMINENT INDIVIDUALS

As you know for some time we have been following the Department closely for advice as to whether 34 specifically named individuals who are prominent in the business and professional fields should be included in the Security Index. These individuals were formerly carried in the Prominent Individuals Subdivision of the Special Section.

By a memorandum dated March 16, 1953, Assistant Attorney General [redacted] advised that preliminary reviews had been conducted on the 34 individuals specifically named in earlier memoranda but that he was withholding a final determination on these names until the Criminal Division had had some further experience in the processing of other names on the Security Index.

For your information on June 18, 1953, when Supervisor [redacted] was contacting [redacted] on another matter, [redacted] advised that the reports on the 34 prominent individuals had been reviewed and that advice in each case will be forwarded to the Bureau in the near future.

ACTION:

This is for your information. We will continue to follow this matter closely.

SUBJECT: SECURITY INDEX CARD STATISTICS

There are attached two copies of a table showing by Field Office the total number of Security Index cards in our files. This table indicates the nationalistic tendency, the dangerousness classification, sex, race, citizenship status, and others on one of the "special lists." A key to the abbreviations is also included.

These statistics are based on Statistical Section Records as of May 15, 1953.

Director, FBI, from SAC, San Francisco

July 1, 1953

Re: SECURITY INDEX--PREPARATION OF SUMMARY REPORTS

As the Bureau is aware, since March 31, 1953 when the last quarterly report was submitted by this office, it has become necessary to suspend the security index summary report program as such in the San Francisco Division, because of the necessity of assigning as much personnel as possible to the development and maintenance of underground sources and to the other security responsibilities of this division.

The last estimate submitted on March 31, 1953 indicated that the San Francisco Office would complete the summary report project by December 1, 1953. It has been necessary to revise this estimate due to the discontinuance of the summary report program.

Bulet dated June 22, 1953 concerning the inspection of the San Francisco Division reflected that the summary report project should be completed by December 1, 1953. In order to fully comply with these instructions, it will be necessary to reinstitute the summary report program contrary to current Bureau regulations. Therefore, UACB, it is being assumed that the Bureau will not require this office to complete the summary report project by December 1, 1953.

It is to be noted from the foregoing that all initial summary reports have been submitted on subjects carried in the special section, in the key facility section, and in the top functionary section.

STANDARD FORM NO. 64

Office Memorandum • UNITED STATES GOVERNMENT

DATE: 6/4/53

TO :

FROM :

SUBJECT: PROPOSED ADMINISTRATIVE PAGE
FOR SECURITY MATTERS

SYNOPSIS:

A stenographer of the San Francisco Office has suggested the Bureau prepare a printed form of Administrative page on mimeograph paper and white onionskin which would contain the headings for documentation and be filled in when a security report is typed.

The views of five offices and the Domestic Intelligence Division were requested and they unanimously were in favor of adopting the proposed procedure.

ADVANTAGES:

1. Would save stenographic time
2. Would insure completely uniform administrative pages
3. Would assist agents in writing security reports, particularly when a considerable amount of documentation is involved
4. Would eliminate necessity of agent dictating the headings

DISADVANTAGES:

None

RECOMMENDATION:

It is recommended the suggestion be adopted and set up in the following manner:

<u>Identity of Source</u>	<u>Date of Activity And/or Description of Information</u>	<u>Date Received</u>	<u>Agent to whom Furnished</u>	<u>File Number where located</u>
-------------------------------	-------------------------------------------------------------------	--------------------------	----------------------------------------	------------------------------------------

DETAILS

A stenographer of the San Francisco Office has suggested the Bureau prepare a printed form of administrative page on both onionskin and mimeograph paper which would contain the headings for documentation and be filled in when a security report is typed.

The views of the New York, Los Angeles, Cleveland, Chicago, and San Francisco Offices in addition to the Domestic Intelligence Division were requested as to the practicability and desirability of the suggestion.

The New York Office stated the use of such headings is a highly desirable procedure and that the form would undoubtedly save stenographic time.

The Los Angeles Office advised the proposed form had been discussed with stenographers and agents working on security type reports and it was the consensus that the form would save stenographic time, insure completely uniform administrative pages and eliminate the necessity of dictating the headings.

The Cleveland Division was of the opinion the suggested form would save a substantial amount of stenographic time and be of considerable assistance to agents in rough drafting administrative pages of reports where a considerable amount of documentation is required. Cleveland recommended that "where known, otherwise date of report" be added to the heading "Date received" since in past years the exact date received was not always recorded and therefore the date of the report was used to assist in identifying the particular report.

Also that it would be expedient to add "or agent directing to file" to the heading "agent to whom furnished" since in old cases the agent to whom the informant's report was furnished was not identified and therefore the agent who directed the report to the file is used for identification.

(It is apparent that Cleveland's suggestions for addition to the recommended headings would result in a lack of clarity as to which item was referred to in the entry under the heading. A brief explanation under the recommended headings should suffice to explain any situation outside the norm.)

The Chicago Division stated the suggestion is an excellent one and recommended that more space be allotted under the heading "Date of Activity and/or Description of information" than was indicated on the attachment inasmuch as this space usually requires more typing than in the other captions.

The San Francisco Office advised the proposed form would save considerable stenographic time in those offices producing a large volume of security type reports.

~~EDWARD R. MCNAUL~~, Chief, Internal Security Section, Domestic Intelligence Division, advised the proposed form would save considerable stenographic time and recommended its adoption. ~~EDWARD R. MCNAUL~~ recommended the following headings for the proposed form which are identical with those in the form proposed by San Francisco which are in accordance with the headings set out in No Number SAC Letter dated 3/14/52:

<u>Identity of Source</u>	<u>Date of Activity And/or Description of Information</u>	<u>Date Received</u>	<u>Agent to whom Furnished</u>	<u>File Number where Located</u>
---------------------------	-----------------------------------------------------------	----------------------	--------------------------------	----------------------------------

UNITED STATES DEPARTMENT OF JUSTICE
FEDERAL BUREAU OF INVESTIGATION

EMPLOYEE SUGGESTION

Date June 26, 1953To: Director, FBIFrom: SAField Office or Division New Orleans

SUGGESTION: That a form similar to the one attached be utilized in the preparation of Communist Index cards throughout the field. It will be submitted by the individual agent to whom a case is assigned as soon as it becomes apparent from investigation that the subject qualifies for inclusion in the Communist Index. From the data on the form, a designated employee in the Chief Clerk's Office will prepare a Communist Index card and the form may then be destroyed.

Its advantages are: All Communist Index cards will be prepared by one employee, insuring a high degree of uniformity. Agents can submit Communist Index nominees promptly and on a current basis without involving a stenographer. It insures that the clerical employee who prepares the cards receives the full and complete information necessary for their proper preparation.

It should save at least \$ Unknown annually.

The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States.

~~COPIES DESTROYED~~

(Signature of Suggestor)

Comments and recommendation of Supervisor, SAC, or Assistant Director:

I recommend the suggestion be adopted.

AUTO REGISTRATION INDEX
SECURITY MATTER - C

Security Trials Administration

Reference is made to the memorandum from the San Francisco office dated April 9, 1953, and June 10, 1953, requesting authority to continue the use of an Auto Registration Index for the purpose of facilitating the identification of individuals involved in security investigations. There is enclosed herewith for the Los Angeles and San Diego Offices one copy each of the referenced memoranda from San Francisco.

In view of the justification which has been submitted for the maintenance of an Auto Registration Index by the San Francisco Office, the Bureau has no objection to the maintenance of such an index provided its maintenance does not involve a great deal of personnel time which would outweigh the advantages which are being gained from its use. Inasmuch as the Los Angeles and San Diego Offices are confronted with the same problem as the San Francisco Office with regard to obtaining auto registration data, those offices are authorized to set up and maintain an Auto Registration Index in the manner described by the San Francisco Office provided those offices determine that the use of such an index will facilitate security investigations in their territories.

Such an index must be maintained in a current status and when data concerning in the index is determined to be no longer applicable to individuals identified, the cards should be destroyed. If it is determined, in the future, that this index no longer serves the purpose described by the San Francisco Office, it should be destroyed.

AUTO REGISTRATION INDEX - General
SAN FRANCISCO OFFICE
SECURITY SECTION - C
Bufile

Synopsis:

The San Francisco Office requests authority to continue an Auto Registration Index for the purpose of identifying persons occupying automobiles involved in physical surveillances in security cases. State of California maintains data on automobile registrations in central file and no distribution is made throughout state. Maintenance of this index results in the saving of much time and effort in making proper identifications in security investigations in San Francisco. Security Section recommends authorization of this index in San Francisco and in Los Angeles and San Diego Offices if they desire its use. Letter to San Francisco, Los Angeles and San Diego attached subject to your approval and that of the Training and Inspection Division.

Recommendation:

It is recommended that the San Francisco Office be authorized to continue maintenance of its Auto Registration Index. They strongly recommend its use and point out that it will not involve a great deal of time and does facilitate the identification of individuals observed in connection with surveillances on security cases.

It is further recommended that such an index be authorized for the Los Angeles and San Diego Offices if they desire to use it inasmuch as they are confronted with the same problems as the San Francisco Office in the state of California.

UNRECORDED
7-14-53

If you agree, this matter should be referred to the Training and Inspection Division for concurrence. In the event this index is approved, there is a typed herewith a letter to San Francisco, with copies to Los Angeles and San Diego, authorizing an Auto Registration Index for those offices.

Details:

The San Francisco Office has requested Bureau authorization for the continuance of an Auto Registration Index which has been set up in that office for the purpose of assisting in identifying persons occupying automobiles involved in physical surveillances in the security field and who are identified as being involved in security investigations. San Francisco advised that at the present time they have an index consisting of approximately 500 license numbers for the State of California which pertain to security subjects in San Francisco. They point out that in security investigations, experience has shown that the same automobiles are observed continually in numerous physical surveillances in security cases. Consequently, the automobile registration data is repeatedly required to identify subjects involved. This data is often needed quickly and unless it is readily available its value in conducting physical surveillances is seriously impaired. They state that the maintenance of this index results in the saving of much time and effort in making proper identifications.

In response to San Francisco's initial letter requesting Bureau approval for continuance of this index, we asked them to advise if auto registrations can be obtained from state authorities and whether, in the State of California, automobile license numbers are transferred with an automobile to a new owner when ownership is changed. They were also requested to advise of the approximate size to which this index can be expected to expand and the number of years which California license numbers will remain unchanged.

7-14-53

San Francisco has advised that under the license system employed in California, it is not possible to obtain identifying data on automobile registration from state authorities. They are filed in a central file at Sacramento and no distribution is made throughout the state. Automobile license numbers are transferred with the automobile to a new owner when ownership is changed. The present license plates which were produced in 1952 will be utilized for a 5 year period. San Francisco does not expect such an index to exceed 2,000 license numbers in their division. They have pointed out that the clerical time needed to maintain this index is negligible and that during a 5 week test period only 2 hours clerical time was consumed in maintaining the index.

The index is maintained through the use of 3 by 5 cards. When an Agent identifies an automobile in connection with security work, the registration data is turned in by him to a clerical employee who prepares a general index card and 2 other cards for the auto index by name of the owner and by licence number. These are filed in the Auto Registration Index and provide a ready reference for Agents desiring such data at a subsequent date.

UNRECORDED
7-14-53

(o) SECURITY INDEX - PREPARATION OF SUMMARY REPORTS -- By SAC Letter Number 85 (H) dated September 3, 1952, the Bureau discontinued the summary report project in all offices to enable you to concentrate on reducing the backlog and delinquency in the security field. By SAC Letter Number 111 (B) dated October 21, 1952, you were instructed to reinstitute the project in your office if personnel was available. By SAC Letter Number 6 (H) dated January 13, 1953, you were instructed that the moratorium was to remain in effect in your office if personnel was not yet available to the project until further instructions were received from the Bureau.

Effective immediately all offices, with the exception of the New York Office and those who have completed the submission of initial summary reports on Security Index cases, are to resume the preparation of summary reports in accordance with the schedule of each office which was set up prior to the declaration of the moratorium. All such offices are to comply with the instructions which were in effect prior to the moratorium.

The quarterly status letter which was due from your office on July 1, 1953, should be submitted promptly if this has not already been done. You will continue to submit quarterly status letters advising of your progress in the project. The Bureau will closely follow your progress in this matter and where it does not appear that you are placing sufficient emphasis on the summary report project you will be required to explain the reasons therefor.

When you have completed the submission of the initial summaries on all of your Security Index subjects you need not continue to submit the quarterly status letters after you have advised the Bureau thereof. Each office completing this phase of the project should, however, comply with existing instructions regarding the submission of annual supplemental reports on Security Index subjects.

It is not desired that cases opened solely for the preparation of summary reports become delinquent. You are to open cases for the preparation of summary reports only at the pace at which you can submit the reports within 45 days from the opening date. This should not be construed by you as deemphasizing the importance of this project. To the contrary your attention is called to previous observations which were set forth in No Number SAC Letter I dated March 14, 1952. It was pointed out therein that it is realized that the preparation of summary reports on Security Index subjects is a

FROM :

SUBJECT: INTERVIEWS WITH SUBJECTS OF SECURITY INVESTIGATIONS

There is attached a proposed SAC Letter regarding interviews with the subjects of security investigations except those considered under the Toplev Program.

The SAC Letter instructs the field to: (1) To thoroughly prepare for and conduct interviews in a searching manner when a subject indicates a willingness to talk, but not to be misled by a subject who does not admit the subversive activities known to the interviewing Agents. (2) Submit the results of all interviews in report form. At this time reports are prepared on interviews only when the subject is on the Security Index or dissemination appears necessary. The report is to contain an admission or denial on all pertinent subversive matters known. A cover memorandum will contain all administrative details or opinions. (3) Reports reflecting the result of interviews will be disseminated to interested outside agencies except where the interviewing Agents determine the subject has potentials of being developed as a security informant; and such dissemination will jeopardize the informant program.

ACTION:

The proposed SAC Letter is attached. There is also attached proposed revisions necessary in Section 87C of the Manual of Instructions.

In the event the proposed SAC Letter and Manual changes are approved it is requested that the Training and Inspection Division furnish 50 copies to the Internal Security Section for use of the Security Index Supervisors.

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

SYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in Espionage, Internal Security, Security Matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of June 30, 1953, is set forth herein.

Number of pending active matters in the entire field reduced from 21,740 to 20,970. The delinquent matters in the entire field decreased from 9,730 to 9,558, increasing the delinquency from 44.6% to 45.6%. Letters sent to 21 offices instructing them to reduce their backlog and delinquency.

New York reduced its pending active matters in the three classifications from 6,560 to 6,395 and the number delinquent from 4,557 to 4,449, an increase from approximately 69% to approximately 70%. New York accounts for approximately 30% of the pending active matters and 47% of the delinquency in these classifications in the entire field. New York reduced the number of pending active matters in the 100 classification from 5,652 to 5,530. The number delinquent was reduced from 4,214 to 4,096 or from approximately 75% to 74%.

ACTION:

We will continue to closely follow the field in this matter. You will be advised of the results of the review of the July administrative reports.

RECORDED-48

28-11

Encfile

28 JUL 28 1953

DETAILS:

As you know, since December 1951 we have been closely following, on a monthly basis, the twelve field offices having a large proportion of our pending security work and since March 1952 all offices. We have written letters to the twelve offices and to other offices where progress in reducing the backlog of work and delinquency has not been satisfactory.

The June administrative reports from all offices reflect that the total pending active matters in the C5, 100 and 105 classifications decreased during the month from 21,740 to 20,870. The number of delinquent matters decreased from 9,730 to 9,558, an increase from 44.3% to 45.6%. Twenty-nine offices reduced their total number of pending active matters and twenty-seven offices reduced their delinquency in these classifications. Letters were sent to 21 offices directing them to further reduce their backlog and delinquency in these matters.

The New York Office has approximately 30% of the pending active matters in the C5, 100 and 105 classifications in the entire field. That office has approximately 47% of the number of delinquent matters in these classifications in the entire field. The average delinquency of all other offices combined increased during the month from approximately 34% to approximately 35%. New York's delinquency increased from 69% to 70%.

The bulk of New York's backlog and delinquency is in the 100 classification. During June the number of pending active matters in the 100 classification in the New York Office was reduced from 5,652 to 5,530. The number of such matters which were delinquent was reduced from 4,214 to 4,096. The delinquency decreased slightly from 75% to 74%.

Under date of May 8, 1953, New York advised that as of May 1, 1953, 29 Agents were transferred from the Security Matter Section to the Loyalty Section to work United Nations - Loyalty cases. Subsequently they advised by individual memoranda that the Security Matter cases to which these Agents had been assigned would be reassigned. By letter of June 2, 1953, the status of 100 classification matters in the New York Office compared to the status of their other investigations was brought to the attention of the SAC. The serious situation which faces New York because of their high backlog and delinquency in the 100 classification was pointed out to the SAC. He was informed that the procedure of transferring Agents from security cases to other types of investigations could no longer be condoned by the Bureau and that henceforth when New York has promised action in a security case by a specified date in response to an inquiry by the Bureau and such action is not taken by the time promised, a letter of explanation will be requested. He was instructed to make sufficient personnel from within the office available to this phase of his investigative activities to effect an immediate drastic reduction in his backlog and delinquency and to place his office in a position to resume preparation of summary reports at the earliest possible date. New York has been requested to advise of the action taken to date to comply with the Bureau's instructions of June 2, 1953.

The following statistics reflect the status of pending work including both pending active and pending inactive matters and delinquency for all field divisions as of December 31, 1951, and the progress for the last four months:

7-31-52	13,117	7,965	60.7%
8-31-52	12,611	7,569	60.2%
9-30-52	11,367	5,782	50.4%
10-31-52	11,286	4,957	43.9%
11-30-52	11,148	4,844	43.5%
12-31-52	10,937	4,573	41.9%
1-31-53	10,730	4,696	43.8%
2-28-53	10,721	4,358	40.6%
3-31-53	10,069	4,019	39.9%
4-30-53	9,411	2,887	30.7%
5-31-53	9,277	3,447	37.2%
6-30-53	8,964	3,532	39.4%

During June, seven of the twelve offices reduced the total number of pending active matters in the three classifications and only four reduced the delinquency in the total matters in those classifications.

In regard to the New York Office you will note it has the highest number of the pending active matters and the highest percentage of delinquency of the twelve offices listed. During June the New York Office reduced the number of pending active matters in classifications 65, 100 and 105 by 171 from 6,566 to 6,395 matters and those delinquent by 108 from 4,557 to 4,449. New York's delinquency in the three classifications increased from approximately 69% to approximately 70%.

Status of Security Work in the Remaining Forty Offices

The remaining forty offices are listed according to the percentage of delinquency on June 30, 1953, in total matters in classifications 65, 100 and 105. These statistics reflect the progress during June 1953. It should be noted that many of the smaller offices have no pending matters in classifications 65 and 105 and their entire pending backlog is in classification 100 matters.

STANDARD FORM NO. 64

Office Memorandum • UNITED STATES GOVERNMENT

✓ TO :

DATE: July 15, 1953

FROM :

Security, T.S.F.

SUBJECT: FORMS FOR COMPUTING THE AMOUNT OF
INCOMING MAIL TO SUPERVISORS IN
THE INTERNAL SECURITY SECTION

Attached is a copy of a form to be used by Supervisors in the Internal Security Section and particularly the Security Index Unit to compute a weekly count of incoming mail. This form will be used as a work sheet in order that the amount of mail received by each Supervisor can be determined to see that there is an equitable distribution of the work.

In regard to the Security Index Unit, during a recent inspection the Inspector recommended that the volume of mail received by each Supervisor in that Unit be closely checked to be certain that there is an equitable distribution and to determine if the number of Supervisors assigned to the Security Index Unit is adequate.

ACTION:

It is requested that this form be approved in order that copies may be printed by the Mechanical Section for our use. This memorandum should be submitted to the Training and Inspection Division for their approval. After approval it should be routed to Room 1204 at which time the form will be furnished to the Mechanical Section.

Office Memorandum • UNITED STATES GOVERNMENT

TO :

DATE: June 30, 1953

FROM :

S/ SUBJECT: SECURITY INDEX -
~~PREPARATION OF SUMMARY REPORTS.~~SYNOPSIS:

The Executives' Conference on January 6, 1953, unanimously voted that the summary report project for Security Index subjects not be reinstated in all offices but that they should continue to work on summary reports as they are able. This matter was set up to be reconsidered by the Executives' Conference on July 1, 1953. During the first three months of 1953 the field submitted 1,453 summary reports. As of January 1, 1953, the project was 24.9% complete and as of April 1, 1953, it was 34% complete. The eleven larger offices other than New York reduced the number of pending active matters in the and classifications by 1,660 during the period between January 1, 1953 and June 1, 1953. The number delinquent decreased by 1,131 or from 41.9% to 37.2%. The forty smaller offices decreased the pending active matters in these classifications by 321 with delinquency increasing from 27.2% to 29.3%. New York Office has submitted only 6% of their scheduled summary reports. Backlog and delinquency in security investigations in New York remains critical with 6,566 pending active matters as of June 1, 1953, 60% of which were delinquent. This matter should be taken before the Executives' Conference with the recommendation that the summary report project be reinstated in all offices except New York.

RECOMMENDATION:

This matter should be presented to the Executives' Conference for their consideration at this time.

It is recommended that the moratorium be lifted for all offices except the New York Office and that instructions be forwarded to the offices asking them to resume preparation of summary reports in accordance with their schedules which have previously been set up.

The progress of the New York Office in reducing their backlog and delinquency will continue to be closely followed in the Internal Security Section. The summary report project will be reinstated in New York as soon as their backlog and delinquency are reduced to a point where it appears to be a logical step to be taken.

If the above is approved by the Executives' Conference a letter will go forth to all SACs except the New York Office containing the instructions for reinstitution of the project.

DETAILS:

The moratorium on the summary report project

was placed in effect on September 3, 1952. On October 14, 1952, the field was instructed that those offices having personnel available to the project should reinstitute it. The Executives' Conference on January 6, 1953, was of the unanimous opinion that the project should not be reinstated in all offices at that time but that they should continue to work on the summary reports as manpower becomes available in each office and the matter was scheduled for reconsideration by the Executives' Conference on July 1, 1953.

Status of Project

As of January 1, 1953, the field had 15,167 summaries scheduled in Non-Key Figure and Non-Key Facility Security Index cases of which 3,769 or 24.9% had been submitted. By April 1, 1953, the field advised in the required quarterly status letters that they had 15,328 such summaries scheduled of which 5,222 or 34% had been submitted. During the period 1,453 summaries had been prepared.

As of January 1, 1953, nine of the smaller offices had completed the project. As of April 1, 1953, an additional six offices had completed the project.

Status of Backlog and Delinquency of Security Cases

During the period from January 1, 1953, to June 1, 1953, the number of pending active matters in the 65, 100 and 105 classifications in the eleven larger offices, other than New York, decreased by 1,660 or from 10,937 to 9,277. The number delinquent decreased by 1,131 from 4,578 to 3,447 or from 41.9% to 37.2%. During this period the forty smaller offices reduced the number of pending active matters in these classifications by 331 from 6,228 to 5,897. The number delinquent increased by 37 from 1,691 to 1,728 or from 27.2% to 29.3%.

Status of the New York Office

The New York Office has made no progress in the summary report project during the moratorium. As of April 1, 1953, New York had 2,934 summaries scheduled of which only 177 or 6% had been submitted.

The backlog and delinquency in security investigations in New York remain in a critical condition. As of January 1, 1953, New York had 7,605 pending active matters in the 65, 100 and 105 classifications. These were reduced by 1,039 to 6,566 by June 1, 1953. The number delinquent declined by 1,441 from 5,398 to 4,557 or from 79% to 69% during the five-month period.

At the present rate of progress of 9% increased completion for each quarter the summary report project will take from two to three years for completion unless sufficient emphasis is placed on the project at this time. Under the present procedure it will continue to lag and will constitute a large portion of the backlog of the Bureau's work in the security field.

Because of the critical condition of security work in the New York Office it would not be practical to divert Agent manpower to the summary report project from their pending backlog of security cases at this time.

Office Memorandum • UNITED STATES GOVERNMENT

TO :

DATE: July 1, 1953

FROM : THE EXECUTIVES' CONFERENCE

SUBJECT: SECURITY INDEX - ~~CONFIDENTIAL~~
PREPARATION OF SUMMARY REPORTS

The Executives' Conference of July 1, 1953, consisting of Messrs.

, discussed the proposal that the moratorium on the project of submitting summary reports on Security Index subjects be lifted at this time.

You will recall that on September 3, 1952, this moratorium was declared on the summary report project to be reinstated in all offices on January 1, 1953. On January 6, 1953, the Executives' Conference recommended that the moratorium continue in effect but that offices prepare summary reports as they are able and that the matter be reconsidered on July 1, 1953.

As of January 1, 1953, the project was 24.9% completed and as of April 1, 1953, it was 34% completed. Only 15 of the smaller offices have completed submission of all summaries scheduled. Offices other than New York had completed, as of April 1, 1953, 40% of their 12,394 scheduled summaries. New York has completed only 6% of 2,934 of its scheduled summary reports. At the present rate of progress of only 9% increased completion of the project for each quarter it will take from two to three years for completion. The 11 larger offices other than New York reduced the number of pending active matters in the Espionage, Internal Security, Security Matter and foreign intelligence classifications by 1,860 between January 1, 1953, and June 1, 1953. The number delinquent decreased by 1,131 or from 41.9% to 37.2%. The forty smaller offices decreased the pending active matters in these categories by 331 with an increase in delinquency from 27.2% to 29.3%. The backlog and delinquency in security investigations in the New York Office remains critical with 6,566 pending active matters as of June 1, 1953, 69% of which were delinquent.

Executives' Conference Recommendation:

The Executives' Conference was of the unanimous opinion that the summary report project should be reinstated at this time

in all offices except New York which should reinstitute the project as soon as their backlog and delinquency are reduced to a point where it appears to be a logical step. It was observed that the Department is reviewing Security Index cases at this time. This review will be facilitated by the submission of current summary reports through the reinstitution of the project.

If you approve, there is attached hereto a proposed SAC Letter instructing all offices except New York to reinstitute the project and to complete the initial reports within one year.

Office Memorandum • UNITED STATES GOVERNMENT

TO : *C. E. T. - 7-7-53*

DATE: July 7, 1953

FROM :

SUBJECT: SUGGESTION #293-53
FORM FOR PREPARATION OF COMMUNIST INDEX CARDS

The attached Suggestion has been referred to us for our comments by Mr. Mason. This proposal involves the approval of a suggested form to be utilized by Agents in the field when recommending the preparation of Communist Index cards on individuals which are to be filed in the Communist Index within each field office. It is suggested that when an individual Agent has identified an individual as being one upon whom a Communist Index card should be prepared the suggested form can be utilized by the Agent and furnished to the designated employee in the field office who will prepare the Communist Index card and the form will then be destroyed.

RECOMMENDATION:

It is recommended by the Internal Security Section that this form be adopted inasmuch as it will facilitate the preparation of Communist Index cards in the field and will standardize the form in which Agents will submit the required data from Communist Index cards. If you agree, this memorandum and the attached Suggestion should be referred to the Training and Inspection Division for further action.

UNITED STATES DEPARTMENT OF JUSTICE
FEDERAL BUREAU OF INVESTIGATION

EMPLOYEE SUGGESTION

Date June 24, 1953To: Director, FBIFrom: Field Office or Division New Orleans

SUGGESTION: That a form similar to the one attached be utilized in the preparation of Communist Index cards throughout the field. It will be submitted by the individual agent to whom a case is assigned as soon as it becomes apparent from investigation that the subject qualifies for inclusion in the Communist Index. From the data on the form, a designated employee in the Chief Clerk's Office will prepare a Communist Index card and the form may then be destroyed.

Its advantages are: All Communist Index cards will be prepared by one employee, insuring a high degree of uniformity. Agents can submit Communist Index nominees promptly and on a current basis without involving a stenographer. It insures that the clerical employee who prepares the cards receives the full and complete information necessary for their proper preparation.

It should save at least \$ Unknown annually.

The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States.

(Signature of Suggestor)

Comments and recommendation of Supervisor, SAC, or Assistant Director:

I recommend the suggestion be adopted.

Enc 1

SUBJECT:

C.P. 16781

SUGGESTION #293-53
SUGGESTED FORM FOR PREPARATION OF
COMMUNIST INDEX CARDS

of the New Orleans Division suggested the use of a form for the preparation of Communist Index cards throughout the Field. The form, prepared by the Agent to whom the case is assigned, would set forth the required data for the Communist Index card. A designated employee in the Chief Clerk's Office would then prepare the card from the form which would then be destroyed. It was stated the use of the form would insure a high degree of uniformity and that the clerk who prepares the card would receive full and complete information in addition to facilitating the preparation of the cards on a current basis without using a stenographer.

VIEWS OF WASHINGTON FIELD OFFICE

The Washington Field Office uses a blank index card containing the same printed headings as the suggested form. The Agent either fills out the card himself or dictates it to a stenographer with his other work. The Washington Field Office system is superior to the suggested form in that it eliminates the additional step of preparing the form and transferring the information therefrom to the card.

VIEWS OF DOMESTIC INTELLIGENCE DIVISION

The Domestic Intelligence Division expressed the opinion the proposed form would facilitate the preparation of Communist Index cards in the Field and would standardize the form in which Agents will submit the required data for Communist Index cards.

COMMENTS OF INSPECTOR

stated the proposed form would serve no useful purpose; that Section 87, Page 28 B of the Manual of Instructions already sets forth that the Communist Index card must contain the same information as proposed for the suggested form thus assuring uniformity and that it is a simple matter for the Agent to either make out the card himself or dictate it to a stenographer.

ADVANTAGES OF PROPOSED FORM

None.

DISADVANTAGES

1. Would require the preparation and stocking of an additional field form.
2. Requires an additional step in the preparation of the Communist Index card in that the information on the forms must be transferred to the card thus consuming unproductive clerical time.
3. Section 87, Page 28 B of the Manual of Instruction already provides for the uniform listing of information on the Communist Index card.

RECOMMENDATION

It is recommended the proposed form not be adopted.

EXECUTIVES CONFERENCE ACTION

The Executives Conference of July 22 recommended unanimously unfavorably as to the creation of the proposed form. Present at the Conference were

DETAILS:

~~RECORDED~~ of the New Orleans Division submitted a suggestion to the effect that a form with headings (1. name and aliases, 2. file number, 3. position in party, 4. place of residence, 5. place of employment, 6. citizenship, 7. source and date information received, 8. general statement re dangerousness, potential or actual) should be used in the preparation of Communist Index cards throughout the field; that the form would be submitted by the individual Agent to whom the case is assigned as soon as it becomes apparent from investigation that the subject qualifies for inclusion in the Communist Index and that a designated employee in the Chief Clerk's Office will then prepare a Communist Index card from the form which will thereafter be destroyed.

~~RECORDED~~ stated the proposed form would be advantageous in that all Communist Index cards would be prepared by one employee thus insuring a high degree of uniformity and that the clerk who prepares the cards would receive full and complete information in addition to facilitating the preparation of the cards on a current basis without using a stenographer.

~~RECORDED~~, Supervisor, Security Squad, Washington Field Office, advised that Washington Field Office uses a blank index card containing the same printed headings as the suggested form. The Agent either fills out the card himself or dictates it to a stenographer with his other work. ~~RECORDED~~ stated the Washington Field Office system is superior to the proposed form in that it eliminates the additional step of preparing the form and transferring the information therefrom to the card. ~~RECORDED~~ further advised the Washington Field Office had used a form similar to that now suggested some time ago.

By memorandum dated July 7, 1953, from ~~RECORDED~~ to ~~RECORDED~~ the Domestic Intelligence Division expressed the opinion the proposed form would facilitate the preparation of Communist Index cards in the field and would standardize the form in which Agents would submit the required data for Communist Index cards.

Inspector [REDACTED] stated the proposed form would serve no useful purpose; that Section 87, Page 28 B of the Manual of Instructions already sets forth that the Communist Index card must contain the same information as proposed for the suggested form thus assuring uniformity and that it is a simple matter for the Agent to either make out the card himself or dictate it to a stenographer.

EMPLOYEE SUGGESTION

Date July 28, 1953To: SAC, SPRINGFIELDFrom: Field Office or Division SPRINGFIELD

SUGGESTION:

That when a Security Index subject or individual upon whom a Communist Index card is maintained transfers from one field division to another and such transfer is verified, the information appearing on the Communist Index card be forwarded to the office covering the individual's new place of residence.

Its Advantages are:

That the new office covering the individual's residence will be saved the time consumed by an agent in obtaining the detailed information necessary for inclusion on the new Communist Index card.

It should save at least \$ _____ annually.

The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States.

Comments and recommendation of Supervisor, SAC, or Assistant Director:

I believe this a good suggestion saving agent time in the new office of residence and recommend it be given consideration.

SECURITY-ESPIONAGE CONFERENCE
JULY 20 and 21, 1953

Synopsis:

The Security-Espionage Conference of July 20 and 21, 1953, made observations and recommendations concerning the conduct of interviews of subjects of security investigations, streamlining summary reports on security index subjects and the matter of preparing written instructions for police officers who will conduct apprehensions under the Emergency Detention program. These matters have been considered in the Domestic Intelligence Division with the following results:

(1) While our instructions to the field regarding the conduct of interviews of subjects of security investigations are complete, a brief Memorandum letter is attached calling the field's attention to the possibilities of pitfalls to be encountered in interviews and reiterating the advisability of obtaining signed statements when, in the opinion of the agents, such statements can be obtained without alienating individuals who are otherwise cooperative with us.

(2) Proposals at the conference regarding the elimination of requirements for documentation of all information included in summary reports on Key Figures and other old-time Communists and the elimination of the requirement for documentation of information as carried in informant's files will serve only to reduce the effectiveness of our summary reports which under current instructions are being completely documented. The Bureau to Intelligence Division recommends that we continue to require complete documentation of summary reports.

(3) The recommendation that the Bureau reconsider the advisability of revising our ten instructions for the use of police officers expected to effect apprehensions under the Emergency Detention program is supported by the Domestic Intelligence Division and there is attached a letter to all SAC's advising them that it is permissible to prepare such written instructions.

UNRECORDED
8-6-53

ACTION:

(1) There is attached hereto for your approval a proposed SAC Letter regarding interviews of subjects of security investigations.

(2) If you approve, we will continue our requirements for complete documentation of summary reports and no instructions to the contrary are being issued to the field.

(3) There is attached hereto for your approval a letter to all SAC's authorizing them to prepare written instructions for police officers concerning the conduct of apprehensions to be made by them.

EXECUTIVES' CONFERENCE

August 10, 1953

RECOMMENDATION:

The Executives' Conference, consisting of Messrs.

on August 10, 1953, unanimously recommended that the action indicated above be followed and that the SAC Letters be sent.

AMBITIC

FILE:

At the Security-Sessions Conference held July 19 and 21, 1953, certain observations and recommendations were made concerning the conduct of interviews of subjects of

security investigations, streamlining summary reports on security index subjects and the matter of preparing written instructions for service officers who will conduct apprehensions under the Emergency Detention Program. In my memorandum to you of July 27, 1953, reporting the results of the conference, these items were covered and it was stated that they were under consideration in the Domestic Intelligence Division. Instant memorandum sets forth the recommendations of the Domestic Intelligence Division regarding each of these topics.

Interviews with Subjects of Security Investigations

The manner in which the Bureau can best avoid the pitfalls encountered when subjects, who have been interviewed, later testify before various government committees to information which was not obtained from them during interviews by Bureau Agents was discussed at the conference. The conference considered the advisability of taking signed statements in all interviews of security subjects for the purpose of having the subject state that he has furnished us with all subversive information in his possession. The purpose being to assure that all subversive information is given to us.

The conference felt that there were many practical obstacles to this procedure such as; (1) alienation of individuals who could otherwise be cooperative because by insisting in taking such statements we instill in them a lack of trust and (2) subjects in possession of a large amount of information could not recall all information in their possession at the time of the interviews and by signing such statements would incriminate themselves if at a later date they received information not furnished by them to Bureau Agents. The conference recommended against such a procedure, however, the opinion was expressed at the conference that while the Manual of Instructions covers the necessity for complete and thorough interviews, this is subject matter which can be reiterated, and reemphasized in SAC letters at this point in time on some of the pitfalls in incomplete interviews and suggestions as to how these pitfalls can be avoided.

It is the observation of the Domestic Intelligence Division that our current instructions in the possession of the offices in the form of SAC letters and section 477 of the Manual of Instructions are quite adequate to assure that interviews will bring the desired results if conducted in accordance with such instructions. Numerous SAC letters

have been submitted to the field on the manner of conducting interviews of subjects of security investigations. The issue being SAC Letter Number 53-48 (3). That SAC Letter reiterated previous instructions calling the attention of Agents to the necessity for acquiring themselves not only upon the known background and subversive activities of the subjects being interviewed but also such matters concerning which the subjects might logically have information. The matter of taking signed statements from individuals who prove cooperative into which information they furnish is incorporated has previously been made the subject of instruction to the field. Section 57C of the Manual of Instructions sets forth that information furnished by the subject being interviewed should be reduced to a signed statement if he or she is willing that this be done and it should be ascertained whether the subject is willing to testify to information furnished by him in any possible future federal proceedings.

It is not deemed advisable that it be made mandatory that signed statements be obtained from all subjects who are interviewed and who prove cooperative. The matter of obtaining signed statements must be left to the discretion of the interviewing Agents. The question of obtaining a signed statement will depend upon whether it can be obtained without alienating an otherwise cooperative subject.

There is attached hereto a proposed SAC Letter which calls the field's attention to existing instructions regarding the obtaining of signed statements from subjects who are interviewed.

Security Index - Preparation of Summary Reports

During discussion of the summary report project at the Security-Intelligence Conference it was agreed that the Bureau should study the possibilities of (1) cutting down on the requirements for documentation of information set forth in summary reports by requiring documentation for only the past three years or other pertinent date in cases involving key figures and other old-time Communists and (2) eliminate the requirement for the listing of the actual serial in an informant's file as part of the documentation to a summary report as relying on channelizing memoranda for location of the evidence being reported against a subject in a summary report.

UNRECORDED
8-6-53

The matter of documentation in summary reports has been the subject of considerable discussion and instruction to the field. The requirement for identifying the location of evidence and information within the summary reports was provided by the just last if it became necessary to apprehend subjects included in the security index and to furnish information and evidence to U. S. Attorneys for the conduct of hearings against the individuals, we will necessarily have to be able to put our hands on such evidence and information in the least possible time. Prior to the institution of the summary report project and prior to the current instructions regarding documentation we had no established system of bringing together in one document the information necessary to locate the actual evidence scattered throughout the files of an office against one individual. If our requirements for documentation are relaxed as it is true in any security index case wherein a summary report is being prepared we are definitely creating a hazard of encompassing issues or noting in the preparation of summary reports.

The fact that Key Figures and old-time active Communists are those on which we have an abundance of subversive information should not prompt us to cut down on our requirements for summary reports submitted in their cases merely to streamline the process of preparing their own reports. In so doing we would in effect be selecting information which we would consider should be presented to U. S. Attorneys by the Bureau for consideration as to whether the subjects should be retained in permanent detention during an investigation. Subversive information received by the Bureau ten or twelve years ago would in most instances have just as much effect in obtaining permanent detention of a subject as would submarine information received in the past three years. By eliminating such information from summary reports we would in effect be jailing the case which should be a function of the appropriate representative of the courtroom rather than the Bureau. It is our judgement to cover, through investigation, all subversive information against these individuals and any judgment which may be passed upon them by the Attorney General or any other government representative or court of law should be based upon all evidence available rather than on that selected by us merely because we feel that we have a good case against the subject.

UNRECORDED

8-6-53

Therefore, it is the recommendation of the Domestic Intelligence Division that the documentation in summary reports of May 11 and all other summaries concerning communists not be restricted to the most three years and that summary reports continue to contain the pertinent information regarding all known subversive activities of the subjects of the reports.

The second phase of the above observations having to do with the elimination of the listing in a summary report of the actual serial where the information can be found in an informant's file would not be satisfactory from our viewpoint. Under present instructions the field, in documenting information appearing in summary reports is to designate in the administrative portion the actual location of the evidence or information in the office files. Under current instructions that location is reflected on the channelizing memoranda which appear in the case file of each subject and it is only necessary to place that information in the report without extensive file review. In earlier years prior to our current channelizing procedure this data did not appear in the case files of subjects and in order to obtain such evidence or information for presentation to a U. S. Attorney in the form of memoranda it would be necessary to conduct extensive file reviews at a time when we would be in an emergency and would not be able to devote the time necessary to such a project. By requiring the field to obtain this documentation at this time and to list it in the summary reports as being prepared we are streamlining our procedure in the event of an emergency. The Domestic Intelligence Division believes that we should proceed under our current instructions with regard to requiring the field to obtain this documentation.

Emergency Detention Program

By letter dated June 23, 1953, the Bureau instructed all offices that no written instructions should be prepared for dissemination to police officers who will make apprehensions under the Emergency Detention Law. However, oral instructions which will be necessary for police officers who participate in the apprehensions should be given orally.

UNRECORDED
8-6-53

at the time their assignments are made to them by Bureau Agents. These instructions were issued because it was felt that written instructions concerning the conduct of apprehensions should not be distributed to police officers because of the hazard of their exposure to the public and vice versa. It was also felt that any such instructions could be given orally in a very brief time by Bureau Agents.

Those present at the conference were of the definite opinion that under conditions expected to exist when this Program is put into effect it will not be possible to issue instructions to police officers orally which will serve the purpose. It was their feeling that unless definite instructions are issued the appropriate filling out of forms, service of the warrants, handling of evidence, arrests, etc., will not be properly carried out by the police. The conferees were of the opinion that for this Program to work effectively police officers who are assigned to apprehensions should be furnished with written instructions at the apprehension time and that the instructions should be so prepared that if they became public they would stand up under public scrutiny. The conference recommended that the Bureau reconsider this matter.

This matter has been reconsidered in the Domestic Intelligence Division and in view of the opinion of Bureau men in the field who are working with this Program we feel that the Field should be permitted to prepare the necessary written instructions for police officers to be used in the execution of the MAC until the new rules take effect. At that time these instructions can be furnished to the police officers for their use as a guide to the conduct of the apprehensions. There is enclosed hereto a proposed letter to all MACs regarding this matter.

August 12, 1953

SAC, Albany

Director, FBI

CONFIDENTIAL

C
SECURITY INDEX - GENERAL
UNAVAILABLE SECTION

SAC Letter No. 53-30 dated May 1, 1953, contained instructions for setting up the Unavailable section in the Security Index. You were instructed therein that the Security Index cards of subjects who are missing, out of the country or imprisoned are to be changed to reflect the proper status of the subjects as being unavailable. You were also instructed to submit forms FD-122 on such subjects reflecting their unavailable status and upon receipt from the Bureau of the new Security Index cards one card was to be filed in the Unavailable Section and one in the alphabetical section.

These instructions are being altered to provide for the filing of cards of Special Section subjects who are missing, out of the country or are imprisoned, in the Special Section rather than the Unavailable Section. Forms FD-122 shall continue to be submitted whenever a Special Section subject who continues to qualify for the Special Section is found to be missing, out of the country or imprisoned, with the appropriate unavailable category indicated thereon. Upon receipt of such forms at the Bureau, new cards will be prepared with the Special Section designation retained on the new cards in addition to the Missing (MI), Out of Country (OC) or Imprisoned (PR) designation. Upon receipt of such cards from the Bureau, one of the cards will be filed in the Special Section of your Security Index rather than in the Unavailable Section and the other card will be filed in the Alphabetical Section. This procedure will provide for continued identification of special section subjects in the field Security Index and retention of their cards in the Special Section where warranted.

Of course, if a subject no longer comes within one of the categories for the Special Section and he is found to be missing, out of the country or imprisoned, the Special Section designation should be deleted. In such instances when the new cards are received from the Bureau, they should be filed in the Unavailable Section rather than in the Special Section.

NOTE ON YELLOW: These instructions are being issued to provide for the continued identification of Special Section subjects in the field Security Index when such subjects are found to be missing, out of the country or imprisoned. At the present time, there are but approximately six to eight Security Index cards which will be affected by these instructions; however, it is deemed advisable that all offices be made aware of this filing procedure at this time in the event Special Section subjects in their Security Index become missing, out of the country or imprisoned.

STANDARD FORM NO. 64

Office Memorandum • UNITED GOVERNMENT

TO :

DATE: August 7, 1953

FROM :

SUBJECT:

SECURITY INDEX -
PREPARATION OF SUMMARY REPORTS

SYNOPSIS:

The field has submitted 6,697 summary reports in Non-Key Figure and Non-Key Facility Security Index cases. This is 43% of such cases in which summary reports are scheduled for preparation. Twenty-three offices having comparatively few Security Index cases have completed the project. Breakdown of status of project in each office attached hereto.

ACTION:

None. Submitted for your information.

The next quarterly status letters will reflect the status of the project as of October 1, 1953. You will be advised of the status of the project at that time.

DETAILS:

Each office is required to submit a quarterly status letter in connection with the project of preparing summary reports reflecting the progress made in submission of these reports. These status letters include statistics on all Security Index subjects who are not employed in Key Facilities or are not Key Figures. Summary reports on Key Facility employees were to be submitted at the time that the regularly scheduled six-month reports were due in each case. Summaries on Key Figures are being deferred until after summaries are prepared on all other Security Index subjects.

The following tabulation reflects the status of this project as of the dates indicated. The differences in the figures appearing in the left hand column are due to changes in categories of cases in the Security Index because of deletions of Key Figures or the subjects become no longer associated with Key Facilities as well as other variations in the content of the Security Index.

	<u>Number of Summaries Scheduled in Non-Key Facility and Non-Key Figure Cases</u>	<u>Number of Summaries Submitted</u>	<u>Percentage Completed</u>
April 1, 1952	14,606	1,196	8.2%
July 1, 1952	14,643	2,071	14%
October 1, 1952	15,073	3,133	20.8%
January 1, 1953	15,167	3,769	24.9%
April 1, 1953	15,328	5,222	34%
July 1, 1953	15,495	6,697	43%

Number of Offices Who
Have Completed the
Project on the
Dates Indicated

April 1, 1952	4
July 1, 1952	6
October 1, 1952	9
January 1, 1953	9
April 1, 1953	15
July 1, 1953	23

These are offices having a comparatively small
number of Security Index subjects.

As you know a moratorium was declared on the project until January 1, 1953, by SAC Letter Number 85 (H) dated September 3, 1952, to permit reduction of the backlog and delinquency in security work. This moratorium was partially lifted by SAC Letter Number 106 (A) dated October 14, 1952, which instructed those offices having personnel available to the project to reinstitute it immediately. By SAC Letter Number 53-48 dated July 14, 1953, the project was reinstated in all offices except New York, to be completed by July 1954.

Attached for your information is a breakdown of the status of the project in each office as of July 1, 1953.

Office Memorandum • UNITED STATES GOVERNMENT

TO : [REDACTED]

DATE: August 13, 1953

FROM : [REDACTED]

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

SYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in Espionage, Internal Security, Security Matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of July 31, 1953, is set forth herein.

Number of pending active matters in the entire field reduced from 20,970 to 20,180. The delinquent matters in the entire field decreased from 9,558 to 9,411, increasing the delinquency from 45.6% to 46.6%. Letters sent to 15 offices instructing them to reduce their backlog and delinquency.

New York reduced its pending active matters in the three classifications from 6,395 to 6,126 and the number delinquent from 4,449 to 4,295, remaining at approximately 70%. New York accounts for approximately 33% of the pending active matters and 46% of the delinquency in these classifications in the entire field. New York reduced the number of pending active matters in the 100 classification from 5,530 to 5,309. The number delinquent was reduced from 4,096 to 3,956, increasing from approximately 74% to 75%.

ACTION:

We will continue to closely follow the field in this matter. You will be advised of the results of the review of the August administrative reports.

RECORDED - 91

EX-121

PL

Bufile

DETAILS:

As you know, since December 1951 we have been closely following, on a monthly basis, the twelve field offices having a large proportion of our pending security work and since March 1952 all offices. We have written letters to the twelve offices and to other offices where progress in reducing the backlog of work and delinquency has not been satisfactory.

The July administrative reports from all offices reflect that the total pending active matters in the 65, 100 and 105 classifications decreased during the month from 20,970 to 20,180. The number of delinquent matters decreased from 9,558 to 9,411, an increase from 45.6% to 46.6%. Thirty offices reduced their total number of pending active matters and twenty-five offices reduced their delinquency in these classifications. Letters were sent to 15 offices directing them to further reduce their backlog and delinquency in these matters.

The New York Office has approximately 33% of the pending active matters in the 65, 100 and 105 classifications in the entire field. That office has approximately 46% of the number of delinquent matters in these classifications in the entire field. The average delinquency of all other offices combined increased during the month from approximately 35% to approximately 36%. New York's delinquency remained at 70%.

The bulk of New York's backlog and delinquency is in the 100 classification. During June the number of pending active matters in the 100 classification in the New York Office was reduced from 5,530 to 5,309. The number of such matters which were delinquent was reduced from 4,096 to 3,956. The

delinquency increased slightly from 74% to 75%.

Under date of July 21, 1953, New York advised that additional Agents were being assigned to Section 12, which handles this phase of their investigative work, and in the immediate future they expect to have approximately 200 Agents assigned to this Section. They advised that this Section has been reorganized and divided into seven separate squads, each having a full-time Supervisor who will be in a position to more closely supervise the Agents' output on a daily basis and give appropriate time and attention to the individual Agent's problems. They have also initiated a training program for the purpose of instructing Agents in the handling of Security Matter cases to expedite these matters.

The following statistics reflect the status of pending work including both pending active and pending inactive matters and delinquency for all field divisions as of December 31, 1951, and the progress for the last four months:

5-31-52	14,246	9,008	63.2%
6-30-52	14,157	9,103	64.3%
7-31-52	13,117	7,965	60.7%
8-31-52	12,611	7,589	60.2%
9-30-52	11,367	5,732	50.4%
10-31-52	11,286	4,957	43.9%
11-30-52	11,148	4,844	43.5%
12-31-52	10,937	4,578	41.9%
1-31-53	10,730	4,696	43.8%
2-28-53	10,721	4,358	40.6%
3-31-53	10,069	4,019	39.9%
4-30-53	9,411	2,887	30.7%
5-31-53	9,277	3,447	37.2%
6-30-53	8,964	3,532	39.4%
7-31-53	8,908	3,738	42.2%

During July, seven of the twelve offices reduced the total number of pending active matters in the three classifications and only four reduced the delinquency in the total matters in those classifications.

In regard to the New York Office you will note it has the highest number of the pending active matters and the highest percentage of delinquency of the twelve offices listed. During July the New York Office reduced the number of pending active matters in classifications 65, 100 and 105 by 269 from 6,395 to 6,126 matters and those delinquent by 154 from 4,449 to 4,295. New York's delinquency in the three classifications remained at approximately 70%.

Status of Security Work in the Remaining Forty Offices

The remaining forty offices are listed according to the percentage of delinquency on July 31, 1953, in total matters in classifications 65, 100 and 105. These statistics reflect the progress during July 1953. It should be noted that many of the smaller offices have no pending matters in classifications 65 and 105 and their entire pending backlog is in classification 100 matters.

FROM :

SUBJECT: SECURITY INDEX - G.F.H.

To advise you of the total cards in the Security Index and of the total number approved by the Department to date.

The following is a report on the increase in the Security Index since the last count was furnished to you on July 10, 1953.

<u>Week of</u>	<u>New Cards Added</u>	<u>Cards Cancelled</u>	<u>Net Increase</u>
July 11-17	62	14	48
July 18-24	68	24	44
July 25-31	26	17	11
August 1-7	112	10	102
August 8-14	63	19	44
Total	333	84	249

For your information during the preceding four-week period 430 cards were added and 81 cards were cancelled, a net increase of 349 cards.

The Security Index count as of today is 22,319.

To date the Department has specifically approved in writing the listing of 2,818 names in the Security Index. To date they have not disapproved the listing of any name.

ACTION:

This is for your information.

Office Memorandum • UNITED STATES GOVERNMENT

DATE: 8/21/53

TO :

FROM : The Executives Conference

SUBJECT: SUGGESTION #371-53

6/21/53
The Executives Conference of 8/20/53, Messrs.

SA being present, considered the suggestion of , Jr., Springfield, that when a security index subject or individual upon whom a Communist index card is maintained moves from one field division to another, that the information on the Communist index card be forwarded to the office covering the new place of residence.

The Domestic Intelligence Division is opposed since these cards are kept indefinitely in the office where prepared and if the office of origin is changed, a new office then prepares its own Communist index card. There would be variations in the information on the card at the new office in such matters as place of residence, place of employment, office file number, and similar data, and no value could be seen in forwarding this data to the new office of origin.

Executives Conference Consideration: For the above reasons, unanimously unfavorable.

4
SUBJECT: SUGGESTION NUMBER 371-53
Forwarding Data on Communist Index
Cards to New Office of Origin
Bufile

The attached suggestion has been referred to us for our comment by . It suggests that when a subject of a Communist Index card moves to another field division the information appearing on the card be forwarded to the new office.

Communist Index cards are prepared on each individual concerning whom there is information of a subversive nature whether or not included in the Security Index. It serves as an administrative aid and working index reflecting a central repository on all such names. The cards are kept indefinitely in the office where prepared and no effort is made to keep them in a current status. If the office of origin is changed the new office prepares a card for its Communist Index. Each card contains the following information when available: name and aliases, office file number, membership and position or associations in a subversive group or groups together with the source and date of the information, place of residence, place of employment, citizenship, a general statement to be included, if necessary, by the reviewing Agent which will assist for evaluation purposes to determine whether the individual in question is potentially or actually dangerous.

It appears that there would be very little benefit in forwarding the data on a Communist Index card to the new office of origin. Certain of the items of information are only available in the new office and the other items are readily available when the case is reviewed in the new office of origin to determine whether additional action is necessary.

RECOMMENDATION:

It is the recommendation of the Internal Security Section that the suggestion not be adopted. If you agree, this memorandum should be forwarded to the Training and Inspection Division for further action.

TO: Director ,FBI
FROM: SAC, Chicago ()
SUBJECT: SUGGESTION

August 25, 1953

It is suggested that when the next printing of the FD-122 (recommendat! for SI and/or reflecting changes in SI subject's status(,) and the FD-128 (to change office of origin) is made the words "Registered Mail" be printed on each form in the lower left-hand corner. There are over 1300 individuals in the Security Index of this office and there is a considerable volume of correspondence reflecting day to day changes. By adopting this suggestion, it will automatically insure that this type of correspondence will be sent via registered mail and eliminate human error in failing to properly designate this type of correspondence to go registered. At the same time a small amount of typing time would be saved on each form.

The above suggestion was submitted by SA

UNITED STATES DEPARTMENT OF JUSTICE
FEDERAL BUREAU OF INVESTIGATION

EMPLOYEE SUGGESTION

10 AF

Date 8/18/53

To: _____

From: _____

Field Office or Division NEWARK

SUGGESTION: It is recommended that a notation be placed on the Security Index Cards maintained in the Geographical Section setting forth the exact location of the residence of SI subjects residing in rural areas. In the event an SI subject is employed in a rural area, the precise location of his place of employment also should be indicated. This notation would include the most direct route to the subject's residence and/or place of employment; such route to commence at a municipality readily located.

Its advantages are:

This procedure would enable Special Agents unfamiliar with a particular rural area to locate immediately SI subjects scheduled for apprehension.

It should save at least \$ _____ annually.

The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States.

Comments and recommendation of Supervisor, SAC, or Assistant Director:

This suggestion appears to have merit. Additional work will be required, but the results would be beneficial to the Emergency Detention Program.

1526

September 4, 1953

SAC, Newark

Director, FBI

SECURITY INDEX CARDS

Reference is made to the suggestion of
Special Agent , dated
August 18, 1953, at Newark, that a notation be
placed on Security Index cards maintained in the
Geographical Section setting forth the exact
location of the residence and/or place of employment
of subjects residing or working in rural areas.

As you know Security Index subjects are
presently assigned to Special Agents for apprehension
purposes and the Agents are to acquaint themselves
with the subjects they are to apprehend. However,
it is realized that in certain rural areas it may
be desirable to place detailed directions to a
subject's residence and place of employment on the
subject's Security Index card. The Bureau has no
objection to the placing of such data on the reverse
side of the Security Index card along with the
other descriptive data.

The Bureau appreciates the interest
expressed by Special Agent in submitting
this suggestion and you should advise him of the
decision in this matter.

Office Memorandum • UNITED STATES GOVERNMENT

TO : _____

DATE: September 2, 1953

FROM : _____

SUBJECT: SECURITY INDEX CARDS
SUGGESTION #418-53

In Suggestion #418-53 attached Special Agent _____, of the Newark Office, suggests that a notation be placed on Security Index cards maintained in the Geographical Section of the Security Index setting forth the exact location of the residence and/or place of employment of subjects residing or working in rural areas. The data is to include information as to the most direct route to the place of residence and/or employment. He states that it would enable Special Agents unfamiliar with a particular rural area to locate Security Index subjects immediately at the time of an emergency.

OBSERVATION:

The Suggestion has merit in certain isolated instances where in rural areas complicated directions are necessary to describe the location of a subject's residence and/or place of employment. When such instances have arisen at the time Security Index cards are prepared field offices have been instructed to include such data on the reverse side of Security Index cards with other descriptive data.

The field is under instructions to assign all Security Index cases to Agents for apprehension purposes and for the Agents to familiarize themselves with all pertinent matters regarding apprehensions including a physical observation of the subjects. For that reason it is not believed that additional over-all instructions to the field are necessary in this matter.

RECOMMENDATION:

If you approve this memorandum should be routed to the Training and Inspection Division. There is also attached a letter to the Newark Office advising that there is no objection to including directions to locate Security Index subjects on the reverse side of Security Index cards.

Office Mem.....m • UNITED STATES GOVERNMENT

TO :

DATE: September 11, 1953

FROM :

KHF

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

SYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in Espionage, Internal Security, Security Matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of August 31, 1953, is set forth herein.

Number of pending active matters in the entire field reduced from 20,180 to 19,493. The delinquent matters in the entire field decreased from 9,411 to 8,495, decreasing the delinquency from 46.6% to 43.6%. Letters sent to 24 offices instructing them to reduce their backlog and delinquency.

New York reduced its pending active matters in the three classifications from 6,126 to 5,851 and the number delinquent from 4,295 to 3,554, to approximately 61%. New York accounts for approximately 30% of the pending active matters and 42% of the delinquency in these classifications in the entire field. New York reduced the number of pending active matters in the 100 classification from 5,309 to 5,047 and the number delinquent from 3,956 to 3,299 or from approximately 75% to 65%.

ACTION:

We will continue to closely follow the field in this matter. You will be advised of the results of the review of the September administrative reports.

RECORDED-74

31 SEP 18 1953

Bufile

R.P. - REC'D. 10/1/53

DETAILS:

As you know, since December 1951 we have been closely following, on a monthly basis, the twelve field offices having a large proportion of our pending security work and since March 1952 all offices. We have written letters to the twelve offices and to other offices where progress in reducing the backlog of work and delinquency has not been satisfactory.

The July administrative reports from all offices reflect that the total pending active matters in the 65, 100 and 105 classifications decreased during the month from 20,180 to 19,493. The number of delinquent matters decreased from 9,411 to 8,495, a decrease from 46.6% to 43.6%. Twenty six offices reduced their total number of pending active matters and twenty three offices reduced their delinquency in these classifications. Letters are being sent to 24 offices directing them to reduce their backlog and delinquency in these matters.

The New York Office has approximately 30% of the pending active matters in the 65, 100 and 105 classifications in the entire field. That office has approximately 42% of the number of delinquent matters in these classifications in the entire field. The average delinquency of all other offices during the month remained at approximately 36%. New York's delinquency decreased from 70% to 61%.

The bulk of New York's backlog and delinquency is in the 100 classification. During August the number of pending active matters in the 100 classification in the New York Office was reduced from 5,309 to 5,047. The number of such matters which were delinquent was reduced from 3,956 to 3,299. The

delinquency in classification 100 decreased from 75% to 65%.

The following statistics reflect the status of pending work including both pending active and pending inactive matters and delinquency for all field divisions as of December 31, 1951, and the progress for the last four months:

10-31-52	11,286	4,957	43.9%
11-30-52	11,148	4,844	43.5%
12-31-52	10,937	4,578	41.9%
1-31-53	10,730	4,696	43.8%
2-28-53	10,721	4,358	40.6%
3-31-53	10,069	4,019	39.9%
4-30-53	9,411	2,887	30.7%
5-31-53	9,277	3,447	37.2%
6-30-53	8,964	3,532	39.4%
7-31-53	8,908	3,758	42.2%
8-31-53	8,547	3,618	42.3%

During August, seven of the twelve offices reduced the total number of pending active matters in the three classifications and six reduced the delinquency in the total matters in those classifications.

In regard to the New York Office you will note it has the highest number of the pending active matters and the highest percentage of delinquency of the twelve offices listed. During August the New York Office reduced the number of pending active matters in classifications 65, 100 and 105 by 275 from 6,126 to 5,851 matters and those delinquent by 741 from 4,295 to 3,554.

Status of Security Work in the Remaining Forty Offices

The remaining forty offices are listed according to the percentage of delinquency on August 31, 1953, in total matters in classifications 65, 100 and 105. These statistics reflect the progress during August 1953. It should be noted that many of the smaller offices have no pending matters in classifications 65 and 105 and their entire pending backlog is in classification 100 matters.

SUBJECT: DISTRIBUTION OF COMMUNISTS
IN ECONOMIC LIFE

Not Classified
unless indicated

Security Index - Agent

SYNOPSIS:

Washington Post article of September 1, 1953, challenged the Attorney General's statement that there may be more Communists in labor unions than anywhere else. The Director requested information regarding the approximate distribution of Communists in schools, industry, etc. Certain statistics are available regarding Security Index subjects on our tabulating equipment. However, all types of employment cannot be tabulated. As of August 15, 1953, the Security Index reflected 14,725 males, 7,593 females, 19,973 white, 2,345 negroes or others. There are 1,546 Security Index subjects employed in Key Facilities, 31 in the U. S. Government, 39 with foreign governments and 13 in the United Nations. To obtain data regarding the employment of all Security Index subjects would require a hand-check of all Security Index cards and in many instances file reviews to determine the job done by each subject. However, 1,000 Security Index cards have been hand-checked to generally determine types of employment which indicate 22.8% in basic industry, 20.5% in light industry, 26.1% in professional and white collar work and the remainder in miscellaneous types of employment and unemployed. Detailed breakdown set out. General detailed breakdown set out regarding types of industry in which the 1,546 Key Facility Security Index subjects are employed.

Classified by 4417
Exempt from CDS, Category
Date of Declassification Indefinite

Information set out indicating since 1948 the Communist Party has stressed necessity of infiltrating basic industry and industries of all types. Information received on August 24, 1953, from San Francisco indicates that at recently concluded conference of the CP, USA, continual stress by the Party is being placed on shifting membership into basic industry and industries of all types.

RECOMMENDATION:

This memorandum has been prepared for the information of the Director.

DETAILS:

Attached is a newspaper article appearing in the September 1, 1953, issue of the Washington Post in which Senator Harley M. Kilgore of West Virginia challenged a statement by the Attorney General that there may be more Communists in labor unions than anywhere else. In regard to this article the Director commented "Let me have memo of approximate distribution of Communists in industry, schools etc."

Security Index cards contain data regarding each individual's employment and generally show the type of employment each person has in our economic life. With the exception of certain key groups such as U. S. Government

employees, individuals having access to Key Facilities, foreign government employees and United Nations employees, the type of employment of all subjects cannot be determined from our tabulating equipment. However, of interest in this matter as of our last complete statistical tabulation of the Security Index, on August 15, 1953, the following facts are noted:

Male	14,725
Female	7,593
White	19,973
Negro and others	2,345
U. S. Government Employees	31
Foreign Government Employees	39
United Nations Employees	13
Atomic Energy Program Employees	1
Communists	20,910

As of August 15, 1953, there were 22,318 Security Index subjects. As of Friday August 26, 1953, there were 22,444 Security Index subjects.

The only way statistics can be determined concerning the types of employment of all the 22,444 Security Index subjects would be to physically check each of the Security Index cards. This would require a tremendous amount of clerical time and it is not believed that it would give a completely accurate picture since in many instances the actual job performed by the individual is not shown although his place of employment is shown. To obtain that data it would be necessary to review the files in such cases. It is not believed the results would warrant such action. However, a hand-check has been made of the first 1,000 cards in the Security Index which indicate Communist membership, association or affiliation and the following statistics are set out:

General Breakdowns

Basic Industry	228	22.8%
Light Industry	205	20.5%
Professional & White Collar	261	26.1%
Miscellaneous		
Communist Party, USA	7	.7%
Farmers & Farm Produce	24	2.4%
Housewives	127	12.7%
Progressive Party	4	.4%
Unemployed	104	10.4%
Unknown Employment	40	4.0%
	1,000	100%

A general detailed determination of the type of employment in which the 1,000 Security Index subjects are engaged is set out as follows. The determination has been made from the type of industry or employment in which a subject is engaged since in many instances the actual job performed by the subjects does not appear on the Security Index cards.

Basic Industry

Aircraft Industries	2
Alumirum Industries	1
Automobile Industries	20
Chemists	2
Communications	2
Electrical & Electronics Industries	10
Gas Companies	2
Laboratories	4
Manufacturing Industries	69
Oil Industries	3
Power Companies	1
Radio Industry (all types)	6
Research	4
Rubber Industries	2
Shipping & Longshoremen	12
Steel & Iron Foundries & Industries	27
Tool & Engineering	2
Transportation (Land & Air)	16
Truckers	5
Unions (Employment by Union)	38
Total	228

Light Industry

Barbers	4
Business Services	15
Carpenters	15
Clothing Industry & Production	13
Food Production & Sales	29
Fur Industries	5
Hotels & Restaurants	19
Laborers	19
Laundries, Cleaners, etc.	15
Painters	5
Printing & Engraving	11
Retail Store Employment (Management & Clerical)	47
Salesmen	8
Total	205

4

Professional and White Collar

Actors	2

Music (Teaching, etc.)	13
Nursing Field	9
Photography	3
Professional Services (Miscellaneous)	15
Publications, Newspapers, etc.	14
Real Estate	3
Schools and Universities	19
Students	43
Teaching, Administration, Clerical, etc.	8
Social & Charitable Organizations	6
State or City Government	7
Stenographers, Clerks & Typists	16
Writers	
Total	261

Miscellaneous

Communist Party - USA	7
Farming, Poultry Raising, etc.	24
Housewives	127
Progressive Party	4
Unemployed	104
Unknown Employment (under investigation)	40
Total	306

For your information we have tabulated the general types of employment or industry in which the 1,546 Key Facility subjects are engaged. The tabulation is set out as follows:

Aircraft and component parts other than engines	97
Aircraft engines and component parts	24
Ammunition production including storage	30
Atomic Research and interest	34
Bearings and Gears	27
Biological Warfare	3
Blood Plasma	1
Chemicals	17
Electrical Equipment	89
Electronics	55
Engines, turbines, pumps, all types and component parts	155
Gasoline and Oil	16
Instruments, Gauges, etc.	43
Machinery and tools	15
Metals other than steel and iron industry	75
Photographic Equipment	5
Plastics and rayon	7
Radio and Radar	32
Railway Equipment	19
Rubber	24
Shipbuilding Industry including Submarines	31
Steel and Iron production, forgings, etc.	212
Strategic communications	15
Strategic Electric Power	16
Strategic Port Facilities	194
Strategic Transportation	27
Trucks, Tanks, Cranes, Tractors & Vehicles	178
Water Supply	3
Weapons all types including Rockets, Guided Missiles, Torpedoes, Mines, etc.	<u>102</u>
Total	1,546

Communist Party Activity re Employment

On August 4, 1948, at the 14th National Convention of the Communist Party, USA, in New York City, Henry Winston, Communist Party functionary, in a speech to the Convention stated in part "However, in examining the composition of our Party, the following factors must be noted. In the last three years the industrial composition of our Party has increased only by $1\frac{1}{2}$ per cent. At present 51 per cent of our membership are industrial, for which 11 per cent are basic. At the same time, our trade union membership in the last few years showed a decline from 46 per cent to 44 per cent; 28 per cent belonged to various CIO unions, $13\frac{1}{2}$ per cent in A. F. of L. and $2\frac{1}{2}$ per cent in independent unions. Approximately 7 per cent of our industrial workers are not members of any union."

7

During the 15th National Convention of the Communist Party, USA, in New York City held from December 28 to 31, 1950, [redacted], Communist Party functionary, stressed to the Convention the need for the Communist Party to direct militant action in the trade union field.

The March, 1953, issue of the "Party Voice" published by the New York State Communist Party contains an article by Lee Amistad based on a report of the conference of the New York State Communist Party in which he stated that industrial concentration of membership is number one as far as tasks are concerned and every Party committee and every Party leader must be judged from this viewpoint. The article stated a key task in the Party struggle and the main approach to building the Party in industry must be to have Communists in factories and outside concentration must at all times be only a secondary form of approach to the workers. The article further stated that the main task of the New York Party had been to undertake a major shift of a large number of comrades to heavy industry throughout the state, to build a substantial number of new shop clubs, to shift the emphasis of trade union work from left to right-led unions while guaranteeing the left and to shift the attention of the whole Party to the shops and factories and the working class communities.

Under date of August 24, 1953, the San Francisco Office furnished a photographic copy of a 130 page report believed to be a draft of the recently concluded national conference of the Communist Party, USA. This 130 page report was divided into five sections and a trade union report. Section 5 is captioned "Role of the Party - Problems of Party Organization" and in connection with the Party's immediate future task it was set forth that it was necessary to shift the base of the Party into basic industry and that in the forefront of the Party's problems there is the organization of the shop workers already in the Party and to shop clubs with political attention to those shop clubs concerning the Party leadership in every district. It emphasized a Party concentration policy in mass production industries and right-led unions. The document stated that the New York District was a model for the entire country in this respect and that by planning and organization the New York District had already succeeded in concentrating a large number of people in basic industry and it is in the process of concentrating a considerably larger number.

Brownell Gets Challenge on Union Reds

By Jack Bell
Associated Press Reporter

Senator Harley M. Kilgore (D-W. Va.) challenged yesterday a suggestion by Attorney General Herbert Brownell that there may be more Communists in labor unions than anywhere else.

And Sen. Lister Hill (D-Ala.), a member of the Senate Labor Committee, said he thinks the labor unions themselves can be trusted to root Communists out of their ranks as fast as they can be identified.

Brownell said in a copyrighted interview with the magazine U.S. News and World Report that he believes domestic Communists are "a greater menace now than at any time."

He added that "I suppose there are more in labor unions than anywhere else."

Commenting on this, Kilgore said he has no doubt the Communists are doing their utmost to infiltrate organized labor.

"They are the biggest menace the labor unions have to combat," he said. "But I know that the top leaders of labor bitterly hate Communists and are doing everything possible to weed them out."

"I don't agree that there are more Communists in labor unions than anywhere else."

Hill said that Brownell is in a position to know what he is talking about because the Attorney General has access to FBI reports, but the Alabama Senator said he doesn't believe the menace is as bad as Brownell intimated.

"The labor unions have made concerted efforts to get rid of Communists, with the big unions taking the leadership in this effort," he said. "It seems to me they have been very successful in their efforts thus far."

CIO President Walter P. Reuther commented in Detroit:

"American labor has been and is eternally vigilant in fighting communism at the bread and butter level . . . where it builds its power. Our best guarantee against Communist infiltration is in the eternal vigilance of our membership itself."

Brownell did not enlarge upon his suggestion that the Communists have found the labor unions their most fertile field. But the Attorney General said in response to a question that he does not believe the Communists are concentrated in the clergy.

J. B. Matthews, former staff director of the Senate Investigating committee headed by Sen. Joseph R. McCarthy (R-Wisc.) charged in a magazine article that "the largest single group supporting the Communist apparatus in the United States today is composed of Protestant clergymen." Matthews

resigned in the uproar which followed.

Brownell said two or three unions are on an old Justice Department list of subversive organizations, but added they are not major affiliates of the AFL and CIO.

The Attorney General said the Communists had gone underground since prosecution of party leaders and had made detection more difficult by better organization. He said the Communist Party had lost about 75,000 members and was now down to a total of about 25,000.

Security Index-6-1
SUBJECT: SECURITY INDEX SUBJECTS EMPLOYED IN
U. S. GOVERNMENT OR UNITED NATIONS
AND OTHER INTERNATIONAL ORGANIZATIONS
Bufile

SYNOPSIS:

Information included in my memorandum to you dated September 2, 1953, captioned "Distribution of Communists in Economic Life" reflected 31 Security Index subjects employed as of 8/15/53 in the United States Government and 13 in the United Nations or other international organizations. In regard to that information the Director commented "I think we should send memo to A. G. re this aspect & name 31 in U. S. Govt. & 13 in U. N. & point out when we previously called these to Dept's attention." An up-to-date Security Index list is furnished to the Department each month. Since the list furnished to the Department on January 29, 1951, we have listed the names of individuals employed in the United States Government or the United Nations and other international organizations on separate pages, the pages so identified. At the time the individuals in those categories were listed on separate pages, the Department was advised that this was done in order that the number and identity of such individuals could be readily determined. Since that time individuals employed in those categories have been listed on separate pages on the Security Index list furnished to the Department. As of this date, there are only 30 individuals listed as employees of the U. S. Government, the name of Benjamin Senoit Woods having been removed from that listing because no longer employed in the U. S. Government on 8/18/53.

RECOMMENDATION:

If you approve, there is attached a letter to the Attorney General calling his attention to the continued employment of the individuals in the United States Government or in the United Nations and other international organizations.

O.H.

K

DETAILS:

In my memorandum to you dated September 2, 1953, captioned "Distribution of Communists in Economic Life," I advised that as of 8/15/53 the names of 31 individuals were listed in the U. S. Government Employee Section of the Security Index and 13 in the United Nations Employee Section. In that connection the Director commented "I think we should send memo to A. G. re this aspect & name 31 in U. S. Govt. & 13 in U. N. & point out when we previously called these to Dept's attention."

For your information, as of this date only 30 individuals are listed in the U. S. Government Employee Section. The name of [redacted] has been removed from that section because he is no longer an employee of the U. S. Government, on August 18, 1953.

An up-to-date Security Index list is furnished to the Department on a monthly basis. Since January 29, 1951, in order that the number and identity of Security Index subjects employed in the United States Government or the United Nations and other international organizations can readily be determined, the names of those individuals have been listed alphabetically on separate pages attached to the monthly Security Index list. Each page is especially identified as a listing of United States Government or United Nations employees. At the time the individuals employed in those categories were especially set out in the Security Index list furnished to the Department, the matter was called to the attention of [redacted], an assistant to former Deputy Attorney [redacted]. He was advised that those individuals were especially set out in order that the number and identities could be readily determined and special consideration afforded prior to an arrest in event of an emergency in view of the nature of the employment. He was advised that each individuals' subversive affiliations and activities warranted inclusion in the Security Index according to standards in that matter the same as any other individual included in the Security Index list.

STATES DEPARTMENT OF JUSTICE
FEDERAL BUREAU OF INVESTIGATION

EMPLOYEE SUGGESTION

Date 9/24/53

To: Director, FBI

From: _____, Stenographer

Field Office or Division Albany

SUGGESTION: Since Security Index cards are made at the Bureau by machine, it is suggested that they be forwarded in triplicate to the Field Office when so requested by the Field Office on FD 122 recommending subject for inclusion on the Security Index or when submitting change for the S.I. card. A card would be requested in triplicate when the subject resides in territory covered by a Resident Agency, and where presently, a third card must be typed up in the Field for the Resident Agency. The notation "Triplicate copies requested" could be typed in the upper right hand corner of the FD 122.

Its advantages are: It would eliminate making copy of S.I. card as it is received from the Bureau, thus saving time consumed in typing. Description and photo, of course would still be placed on back of the third card, and the Field Office File No. would be typed in on the front. (For example, out of 272 S.I. subjects in the Albany Division, 209 reside in territory covered by Resident Agencies, in which instance an additional copy of S.I. card had to be prepared).

This procedure would insure that R.A. copies of SI cards would contain the most current data on the SI subject. It should save at least \$ annually. Unestimated

The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States.

Comments and recommendation of Supervisor, SAC, or Assistant Director:

Adoption of this suggestion would save considerable work in the field. If this would more than off-set the additional burden placed on the Bureau, its adoption is recommended.

1953

FROM :

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

SYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in Espionage, Internal Security, Security Matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of September 30, 1953, is set forth herein.

Number of pending active matters in the entire field reduced from 19,493 to 19,224. The delinquent matters in the entire field decreased from 8,495 to 7,571, decreasing the delinquency from 43.6% to 39.4%. Letters sent to 23 offices instructing them to reduce their backlog and delinquency.

New York reduced its pending active matters in the three classifications from 5,851 to 5,573 and the number delinquent from 3,554 to 3,103, to approximately 56%. New York accounts for approximately 29% of the pending active matters and 41% of the delinquency in these classifications in the entire field. New York reduced the number of pending active matters in the 100 classification from 5,047 to 4,302 and the number delinquent from 3,299 to 2,828 or from approximately 65% to 59%.

ACTION:

We will continue to closely follow the field in this matter. You will be advised of the results of the review of the October administrative reports.

Bufile [REDACTED]

DETAILS:

As you know, since December 1951 we have been closely following, on a monthly basis, the twelve field offices having a large proportion of our pending security work and since March 1952 all offices. We have written letters to the twelve offices and to other offices where progress in reducing the backlog of work and delinquency has not been satisfactory.

The September administrative reports from all offices reflect that the total pending active matters in the 65, 100 and 105 classifications decreased during the month from 19,493 to 19,224. The number of delinquent matters decreased from 8,495 to 7,571, a decrease from 43.6% to 39.4%. Twenty-one offices reduced their total number of pending active matters and twenty-nine offices reduced their delinquency in these classifications. Letters have been sent to 23 offices directing them to reduce their backlog and delinquency in these matters.

The New York Office has approximately 29% of the pending active matters in the 65, 100 and 105 classifications in the entire field. That office has approximately 41% of the number of delinquent matters in these classifications in the entire field. The average delinquency of all other offices at the end of the month was approximately 33%. New York's delinquency decreased from 61% to 56%.

The bulk of New York's backlog and delinquency is in the 100 classification. During September the number of

pending active matters in the 100 classification in the New York Office was reduced from 5,047 to 4,802. The number of such matters which were delinquent was reduced from 3,299 to 2,828. The delinquency in classification 100 decreased from 65% to 59%.

The following statistics reflect the status of pending work including both pending active and pending inactive matters and delinquency for all field divisions as of December 31, 1951, and the progress for the last four months:

7-31-52	13,117	7,965	60.7%
8-31-52	12,611	7,589	60.2%
9-30-52	11,367	5,732	50.4%
10-31-52	11,286	4,957	43.9%
11-30-52	11,148	4,844	43.5%
12-31-52	10,937	4,578	41.9%
1-31-53	10,730	4,696	43.8%
2-28-53	10,721	4,358	40.6%
3-31-53	10,069	4,019	39.9%
4-30-53	9,411	2,887	30.7%
5-31-53	9,277	3,447	37.2%
6-30-53	8,964	3,532	39.4%
7-31-53	8,908	3,758	42.2%
8-31-53	8,547	3,618	42.3%
9-30-53	8,601	3,249	37.8%

During September, five of the twelve offices reduced the total number of pending active matters in the three classifications and eight reduced the delinquency in the total matters in those classifications.

In regard to the New York Office you will note it has the highest number of the pending active matters and the highest percentage of delinquency of the twelve offices listed. During September, the New York Office reduced the number of pending active matters in classifications 65, 100 and 105 by 272 from 5,851 to 5,573 matters and those delinquent by 451 from 3,554 to 3,103.

Status of Security Work in the Remaining Forty Offices

The remaining forty offices are listed according to the percentage of delinquency on September 30, 1953, in total matters in classifications 65, 100 and 105. These statistics reflect the progress during September 1953. It should be noted that many of the smaller offices have no pending matters in classifications 65 and 105 and their entire pending backlog is in classification 100 matters.

Office Memorandum • UNITED STATES GOVERNMENT

TO : THE DIRECTOR

DATE: October 9,
1953

FROM :

SUBJECT: SECURITY INDEX - APPROVED

To advise you of the total cards in the Security Index and of the total number approved by the Department to date.

The following is a report on the increase in the Security Index since the last count was furnished to you on September 11, 1953.

<u>Week of</u>	<u>New Cards Added</u>	<u>Cards Cancelled</u>	<u>Net Increase</u>
September 12-18	64	17	47
September 19-25	144	13	131
Sept. 26 - Oct. 2	113	20	93
October 2-9	98	23	75
Total	419	73	346

For your information during the preceding four-week period 314 cards were added and 54 cards were cancelled, a net increase of 260 cards.

The Security Index count as of today is 22,925.

The Department has specifically approved in writing the listing of 3,534 names in the Security Index. To date the Department has not disapproved the listing of any name. However, by memorandum from the Attorney General dated September 30, 1953, he advised that he has found it necessary to direct the Criminal Division to cease reviewing the Security Index cases because of present budgetary considerations.

ACTION:

This is for your information.

Office Memorandum • UNITED STATES GOVERNMENT

TO :

DATE: September 24.
1953

FROM :

SUBJECT: SECURITY INDEX SUBJECTS EMPLOYED IN
UNITED STATES GOVERNMENT OR UNITED NATIONS
AND OTHER INTERNATIONAL ORGANIZATIONS

SYNOPSIS:

On September 16, 1953, we submitted to the Attorney General a list of names of Security Index subjects employed in the United States Government and the United Nations categories. The list was prepared from the Security Index cards filed in the Special Section of the Security Index for those categories and the employment shown was that which appeared on each card. A check of the Bureau files on 9-23-53 on these subjects revealed that in the cases of three persons reported employed in the United States Government and two persons in the United Nations the field is in possession of information indicating a change or possible change of employment for each. Current instructions under those circumstances require the field to promptly submit Form FD-122, necessary to the mechanics of having the Security Index cards processed in the Statistical Section. Failure to submit the Forms FD-122 promptly resulted in the cards not being in an up-to-date status. To prevent a recurrence of this situation we are preparing an SAC Letter re-emphasizing the necessity of promptly submitting Form FD-122 whenever employments change. The failure of the field to promptly submit the FD-122 Forms resulted in the cards not being in an up-to-date status, as stated above; however, despite this fact we should have reviewed the files and not relied solely on the information contained on the Security Index cards regarding the employment of these individuals. We are advising the Attorney General that information has been received that the five individuals are no longer employed in the respective categories.

RECOMMENDATION:

If you approve, there is attached a letter to the Attorney General, and an SAC Letter will be prepared re-emphasizing the absolute necessity of submitting Forms FD-122 promptly when changes of employment occur for Security Index subjects.

n/a
12

DETAILS:

Reference is made to the memorandum to the Attorney General dated September 16, 1953, in which we furnished the names of individuals included in the Security Index who are reported employed in the United States Government or the United Nations and other international organizations.

This list was prepared from the Security Index cards filed in the Special Section of the Security Index for the two categories and the employment shown on the Security Index cards was listed in the memorandum.

For your information, a check of the files on 9-23-53 on these subjects revealed that the field is in possession of information indicating a change or possible change of employment for each person listed below:

Under current instructions the field is required under these circumstances to promptly submit a Form FD-122, which is necessary to the mechanics of having the Security Index card processed through

- 2 -

2

the Statistical Section in order that it will be in a current status at all times. The failure of the field to promptly submit the FD-122 Forms has resulted in these Security Index cards not being in an up-to-date status.

In order to prevent a recurrence of a similar situation, we are preparing an SAC Letter, re-emphasizing current Bureau instructions and pointing out the absolute necessity for the prompt submission of Forms FD-122 in connection with changes of employment of individuals included in the Security Index.

Even though the respective field offices had not submitted the necessary changes to our Security Index cards indicating the individuals had changed their employment, we should have reviewed the files rather than relying solely on the Security Index cards for information regarding employment of these individuals.

We are advising the Attorney General that information has been received that five individuals are no longer employed in the United States Government or the United Nations and other international organizations.

SUBJECT:

Security Index - C-1
RECORDS SECTION STREAMLINING COMMITTEE
SUGGESTION #644-53

Classifying Unit representative of the Records Section Streamlining Committee has suggested through the has suggested through the records section Streamlining Committee that form letters from the Department transmitted to the Bureau as enclosures to memoranda authorizing the arrest and detention of security index subjects in the event of an emergency, not be filed inasmuch as the cover memorandum from the Department goes into a control file and necessary information could be noted on the security index card.

The form letter now being prepared in the Department is presently serving as a substitute for a recorded memorandum in each security index subject case file. These have, until recently, been prepared in the Domestic Intelligence Division to indicate in each case file the location and the authority for the detention of the security index subject in the event of certain national emergencies. This matter has been discussed with [redacted] of the Domestic Intelligence Division who states this form constitutes the authority as far as each case file is concerned to the arrest and detention of the subject. He has indicated under plans presently being made, this piece of mail constitutes the most important piece of mail in the case file. He feels, therefore, that it must of necessity continue to be filed and recorded.

RECOMMENDATIONS:

1. Unfavorable.
2. That the attached letter thanking for her suggestion be directed to her.

(J) SECURITY INDEX - CHANGES OF DATA ON SECURITY INDEX CARDS--
Your attention is directed to pages 31a and 31b, Section 87c of the Manual of Instructions. The Manual of Instructions specifically states that the data recorded on Security Index cards shall be in an up-to-date status at all times. It further states that once a Security Index card has been prepared, any information developed which affects the data appearing on the Security Index card must be promptly submitted to the Bureau by Form FD-122. In addition, instructions specifically point out that when a Security Index subject whose card is maintained in the Special Section no longer comes within one of the categories of the Special Section, Form FD-122 must be submitted with the words "Remove from Special Section", typed in the space provided on the form after the words "Miscellaneous" (Specify)."

It has come to the Bureau's attention that information relating to changes of employment has come to the attention of field offices and Form FD-122 has not been submitted promptly in order that the Security Index cards can be changed and amended cards forwarded to the field.

Although field offices have been in possession of information indicating a change of employment, Form FD-122 has not been submitted until the subject's new place of employment has been determined.

I want to reiterate the existing instructions that all Security Index cards shall be in an up-to-date status and that any information developed which affects the data appearing on the Security Index cards must be promptly submitted to the Bureau by Form FD-122.

Therefore, you must be certain when you know a subject is not employed at the place indicated on the existing Security Index card that Form FD-122 is immediately submitted to the Bureau in order that the Security Index card can be amended. If the new place of employment is also known at that time it should be included on the Form. If the new employment is not known the subject's employment should be shown as unknown on the Form and investigation should be immediately conducted to determine the place of employment. When the present employment has been determined another Form FD-122 should be submitted promptly to the Bureau.

Only by close supervision of such matters can our Security Index cards be maintained in a current status.

(M) KEY FACILITIES - PLANT INFORMANTS - SECURITY INDEX - ADJUSTMENT TO KEY FACILITY LIST -- Your attention is directed to paragraph M of SAC Letter Number 53-12 dated February 3, 1953, and to SAC Letter Number 53-51 dated July 21, 1953, with which all continental offices were furnished appropriate State Sections of the sixth edition of the Department of Defense Master Geographical Key Facilities List designated as KFL (F). Reference is also made to paragraph N of SAC Letter Number 53-12 dated February 3, 1953, containing instructions as to adjustments to be made in the Security Index necessitated by changes in the KFL. You have been advised that the Department of Defense would from time to time issue corrected pages to the KFL to reflect any deletions, additions or other changes.

The Department of Defense has now prepared change No. 1 dated September 10, 1953, to the KFL (F). You will note that each line in which a change has occurred has been appropriately marked. However, many of the changes will have no effect upon the operations of the Bureau.

Each change in the KFL (F) has been marked with the figure "1" in the column heading "CH. NO." and the bottom of such pages are marked "Change No. 1." If only one side of a page has been affected by changes, that side will be marked "Change No. 1" and the other side of the page will be marked "original." The symbol "#" appearing in the column heading "CH. NO." indicates that a change has been previously made and is not affected by Change No. 1. In other words, the symbol "#" appears opposite the changes made when the KFL (F) was re-printed in July 1953, copies of which were furnished to you with SAC Letter Number 53-51.

Any changes in the enclosed Change No. 1 to KFL (F) affecting the Plant Informant Program in your office must be handled in accordance with the instructions contained in paragraph M of SAC Letter Number 53-12.

Any changes in Change No. 1 which will affect the data appearing on Security Index cards of subjects employed in key facilities must carefully checked through your Security Index and corrected Form FD-122 submitted to the Bureau in accordance with the instructions contained in paragraph N of SAC Letter Number 53-12.

In order that all continental offices will have up-to-date data pertaining to the KFL (F) all such offices are being

furnished with this SAC Letter, a copy of the "Letter of Promulgation to Holders of the Department of Defense Key Facilities List" dated September 17, 1953, which refers to Change No. 1. All continental offices with the exception of the Albuquerque, Butte, Oklahoma City, Phoenix and Portland offices are being furnished with this SAC Letter, Change No. 1, to appropriate State Sections. No changes have been received affecting the facilities within the territories of the offices named.

The pages in the KFL (F) which have been replaced by Change No. 1 should be destroyed when they are no longer needed to assist you in making the necessary corrections and adjustments in connection with the Plant Informant and Security Index Program.

SECURITY INDEX LIST - C

There is attached hereto a current list
of the names of the individuals maintained in the
Security Index. Names included in the main portion
of the list are arranged alphabetically. The names
of individuals coming within five designated groups
are listed on separate pages. Following each name
is information reflecting the race, sex, birth date,
Bureau file number and the Bureau field office
covering the residence of the individual.

It is requested that this list be given
utmost security.

SECURITY INDEX

ReBulet dated December 29, 1950.

There is enclosed herewith a sealed package containing a new Security Index list of all subjects maintained in the general and Special Sections of the Security Index.

This package should be maintained in your office safe in accordance with instructions in referenced memorandum. This new list replaces the list in your possession. It is your personal responsibility to see that the old list is destroyed by burning.

The Bureau should be advised of your receipt of the attached list and the destruction of the old list.

Office Memorandum • UNITED STATES GOVERNMENT

TO :

DATE: 10/26/53

FROM : EXECUTIVES CONFERENCE

SUBJECT: SUGGESTION #632-53
MADE BY
ALBANY OFFICE
SECURITY INDEX CARDS BE FURNISHED
TO FIELD OFFICES IN TRIPPLICATE
UPON REQUEST

SUGGESTION:

Since Security Index cards are made at the Bureau by machine, it is suggested they be forwarded in triplicate to the field when a request is made by the field office on Form FD-122 recommending the subject for inclusion on the Security Index or when submitting a change for the Security Index card.

A card would be requested in triplicate when the subject resides in a territory covered by a resident agency and where it is presently necessary for a third card to be typed in the field for the resident agency this would be eliminated through adoption of the suggestion. The notation "Triplicate Copies Requested" could be typed in the upper right-hand corner of Form FD-122 (the form for recommendation for Security Index and/or reflecting changes in Security Index subject's status).

The suggesting employee had in mind that this suggestion would effect a saving in typing time and would insure that resident agency copies of Security Index cards would contain the most current data on the Security Index subject.

OBSERVATIONS:

of Albany believes the adoption of this idea would save considerable work in the field and would more than offset the additional burden placed on the Bureau.

The Domestic Intelligence Division pointed out that by No Number SAC Letter dated 4/4/51, all offices were instructed to prepare 5" x 8" cards for each Security Index subject residing in a resident agency territory. Each card would contain the name of the subject, priority designation tabbing for DETCOM and COMSAB of "DC" and "CS", description, residence address, business address and a

Memorandum to [REDACTED]

photograph, if available, to be stapled to the card. Under the present procedure two Security Index cards are prepared in the Statistical Section whenever a new card is added or changes are made to existing cards, and field offices prepare a 5" x 8", as indicated above if the subject resides in a territory covered by a resident agency.

The Domestic intelligence Division does not believe this suggestion should be adopted. They feel that the number of Security Index subjects residing in a resident agency territory is very limited as compared to the total Index of approximately 22,925 cards. The volume of new cards and changes handled per week varies from approximately 450 to 500 items and Bureau supervision necessary to afford special attention to the limited number of cards in which three copies are requested far out weighs the typing time required in the field to type the name of the subject, priority tabbing initials, business and residence addresses on a 5" x 8" card to be placed in resident agencies. The Domestic Intelligence Division is of the opinion that the number of cards prepared at the Bureau should be uniform if we are to handle the volume with a minimum of clerical and supervisory time.

EXECUTIVES CONFERENCE CONSIDERATION:

Per presentation by [REDACTED] at the Executives Conference on 10/22/53.

RECOMMENDATION:

In view of the opposition expressed by the Domestic Intelligence Division and inasmuch as the suggesting employee has already been thanked for her idea, no further action is recommended.

1554

Office Memorandum • UNITED GOVERNMENT

TO :

DATE: October 13,
1953

FROM :

SUBJECT: SECURITY INDEX -
SUGGESTION #632-53

In the attached Suggestion dated 9-24-53, a stenographer in the Albany Office, recommends that when the words "Triplicate Copies Requested" are typed in the upper right-hand corner of Form FD-122 which includes data to be placed on Security Index cards when they are prepared at the Bureau that 3 copies of cards be furnished to the field, one of which would then be available where the subject resides in a territory covered by a Resident Agency. She states that in this manner there will be a saving in typing time in the field office, particularly at Albany where 209 of 272 Security Index subjects reside in territory covered by Resident Agencies.

By No Number SAC Letter dated 4-4-51 all offices were instructed to prepare a 5x8 card for each Security Index subject residing in a Resident Agency territory. The card to contain the name of the subject, priority designation tabbing for Detcom and Comsab of "DG" and "CS", description, residence address, business address and a photograph, if available, to be stapled to the card. Under present procedures, two Security Index cards are prepared in the Statistical Section whenever a new card is added or changes are made to existing cards and offices prepare a 5x8 card as indicated above if the subject resides in a territory covered by a Resident Agency.

It is not believed that the Suggestion should be adopted. The number of Security Index subjects residing in a Resident Agency territory is very limited compared to the total Index of approximately 22,925 cards. The volume of new cards and changes to existing cards handled during a week varies from approximately 450 to 500 items and the supervision necessary at the Bureau to afford special attention to the limited number of cards in which 3 copies are requested far outweighs the typing time required in the field to type the name of the subject, the priority tabbing initials and the business and residence address on a 5x8 card which is to be placed in Resident Agencies. Of course, the description must of necessity be typed on any card used in the field. It is believed that the number of cards prepared at the Bureau should be uniform if we are to handle the volume with a minimum of clerical and supervisory time.

ACTION:

If you approve, this memorandum should be routed to the Training and Inspection Division for their information that the Internal Security Section recommends that the Suggestion not be adopted.
